

Website Option

Creating a website is an excellent way to demonstrate, teach, and excite people about something of interest related to science. A good website is constructed in a logical and user friendly way; all of the links must work, it uses several different forms of media such as graphics, text, and informational search engines to convey information, and is fun to use.

Requirements for Website Option: Student must have the following.

- Full-time computer use with internet access
 - Recommend High Speed Internet
1. Choose a science topic that is of interest to you.
 2. Research your topic to learn more about it. List your sources in bibliography.
 3. Develop a Graphic Organizer of how you want to organize the website and separate your information.
 4. You must find accurate photographs for all pages.
 5. Produce your final presentation using a free website creator such as Google sites or wiki's.
 6. Website pages include the following:
 - Home Page
 - History/Description Page
 - Information pages (4 or more)
 - Quiz using a Google Form
 - Bibliography page

There must be at least 4 website links, 1 video, and 1 widget throughout the website

<i>Content</i>	<i>Points Possible</i>	<i>Points Received</i>
Clearly presents a scientific concept in detail (Information pages)	60	
All pages are linked	30	
Bibliography page	20	
<i>Effective use of multimedia</i>		
Minimum of 8 pages	20	
Pages are user friendly and neat	20	
At least 8 photographs (not clip art), at least 1 per page	20	
Quiz using a Google Form	10	
At least 4 website link, 1 video, and 1 widget present	20	
<i>Total</i>	200	

Student Name: _____
